Subject: RE: Business Park 1 Lift station gate

Mr. Roberts:

EID operations is requesting, for safety purposes, that the existing gate for our Business Park 1 Lift station be moved 30 feet farther into the access road (Cypress Point Court). Currently the gate resides approximately 20 feet from the fog line of Golden Foothill Parkway. EID proposes moving the gate to a final location of the gate to be 50 feet to the east of Golden Foothill Parkway fog line at EID's expense. Our records show the access road property (APN 11708205) is owned by your department.

Please see attached files for locations and further clarification. We look forward to a prompt and hopefully favorable response from your department in resolving this safety issue.

Regards

Hi Tim,

Thank you for providing the files for our review. With the stipulation that all costs for this gate retrofit will be incurred by EID the El Dorado Hills County Water District (Fire Department) has no issue with EID moving the gate to the proposed location.

Let me know if you need anything further from us.

Take Care...

Dave Roberts, Fire Chief
