- A. Directors
- B. Staff
- C. Schedule upcoming committee meetings

XIII. Adjournment

Note: Action may be taken on any item posted on this agenda.

This Board meeting is normally recorded.

EL DORADO HILLS COUNTY WATER DISTRICT

SEVEN HUNDRED SIXTY FOURTH MEETING OF THE BOARD OF DIRECTORS

Thursday, July 20, 2017 6:00 p.m.

District Office, 1050 Wilson Boulevard, El Dorado Hills, CA 95762

I. CALL TO ORDER AND PLEDGE OF ALLEGIANCE

President Hartley called the meeting to order at 6:00 p.m. and Chief Keating led the Pledge of Allegiance. Directors in attendance: Durante, Giraudo, Hartley, Hus, and Winn. Director Winn joined the meeting during the EDH Development Snapshot (Agenda Item IV.A). Staff in attendance: Chief Roberts and Director of Finance Braddock. Counsel Cook was also in attendance.

II. CONSENT CALENDAR

- A. Approve Minutes of the 762nd Board meeting held June 15, 2017
- B. Approve Minutes of the 763rd Special Board meeting held June 21, 2017
- C. Approve Financial Statements for June 2017

Director Durante made a motion to approve the consent calendar, seconded by Director Giraudo and unanimously carried.

President Hartley requested that **Item VI-A** be moved on the agenda after **Item XI. Old Business** and the Board concurred.

III. ORAL COMMUNICATIONS

- A. EDH Professional Firefighters None
- **B. EDH Firefighters Association** None
- C. Latrobe Advisory Committee None
- **D. Public Comment** Tim White, citizen, invited the Board to attend the August meeting for APAC August 9, at 7:00 p.m. Metro Fire Assistant Chief Johnson thanked the prevention team for the help and information as they considered an electronic plan intake process. Richard Ross, citizen, asked if the Board directed the Chief to speak on behalf of the Department regarding legislation SB 649.

IV. PRESENTATION

- **A. EDH Development Snapshot** Fire Marshal Cox presented a slideshow covering current development projects in El Dorado Hills.
- V. CORRESPONDENCE Chief Roberts stated that the company interested in the vacant District property sent a letter of intent to purchase the property and the offer appears to be above market. Counsel Cook stated that a RFP for the property will need to be posted for a minimum of 30 days prior to the sale.

VI. ATTORNEY ITEMS

A. Closed Session; Conference with legal counsel pursuant to Government Code

Section 54956.9 (d)(2); Pending Litigation; One Potential Matter.

VII. COMMITTEE REPORTS

- A. Administrative Committee (Directors Durante and Hartley) No report.
- **B.** Finance Committee (Directors Giraudo and Winn) Director Giraudo reported that the Finance Committee met and is recommending approval of the Staff recommendation under New Business to temporarily increase the approved positions list. He added that the committee also discussed a revision to the check signing procedure.
 - Closed Session pursuant to Government Code Section 54957.6, conference with labor negotiations; items under negotiation: Memorandum of Understanding with the El Dorado Hills Professional Firefighters; District negotiators are Directors Giraudo and Winn or designated alternate – Removed from agenda.

C. Ad Hoc Committee Reports

- 1. Strategic Planning Committee (Directors Hus and Giraudo) No Report. Remove committee from agenda going forward.
- **2. Communications Committee (Directors Durante and Winn)** Chief Roberts reported that he expects that both feasibility studies will be ready for review at the September Board meeting.
- **3.** Training Facility Committee (Directors Hartley and Durante) Chief Roberts reported that Staff met with Dennis Dong for an update and stated that he is coordinating with the vendors for the prebuilt props to verify what is needed for the foundation and get accurate numbers.
- **4.** CSD/Fire Collaboration Committee (Directors Giraudo and Durante)
 No report.
- 5. Station 91 Building Committee (Directors Durante and Giraudo) Chief Roberts stated that West Coast Restoration hired mechanical and electrical engineers to develop plans to be submitted to the County that should be done within the next week and they will move forward when the plans are approved.
- 6. Cameron Park CSD/EDH Fire Collaboration Committee (Directors Durante and Hartley) No report.

VIII. OPERATIONS REPORT

- A. Operations Report (Receive and file)
- **B.** Review and update regarding Joint Powers Authority Director Hartley stated that the JPA is moving forward with the iPCR system.
- **IX. FISCAL ITEMS** Director of Finance Braddock stated that the recently released CalPERS actuarial report noted that the unfunded liability for the Classic Safety Plan

El Dorado Hills County Water District Board of Directors Meeting July 20, 2017 Page 3

went up by about three million dollars and the funded status dropped to 75.1%. She also pointed out the rate projection chart showing a significant increase over the next seven years from 20.5% to 23.2 % and an increase in the UAL payment from the current \$800,000 to \$1,900,000.

A. Review and approve Resolution 2017-23 to approve an amendment to the contract between the Board of Administration California Public Employees' Retirement System and the Board of Directors El Dorado Hills County Water District – Director of Finance Braddock explained that this resolution amends the CalPERS contract aligning it with the stated employee contribution from the approved Administrative Wages and Benefits Agreement.

Director Giraudo made a motion to approve Resolution 2017-23 to approve an amendment to the contract between the Board of Administration California Public Employees' Retirement System and the Board of Directors El Dorado Hills County Water District, seconded by Director Winn, and unanimously carried. (Roll call: Ayes: 5; Noes: 0)

X. NEW BUSINESS

A. Review and approve Resolution 2017-24 confirming the report of the Fire Marshal related to cost of weed abatement and imposing such costs upon properties upon which abatement has occurred – Fire Marshal Cox stated that abatement has occurred on non-compliant lots and this resolution will impose the cost on the property owners. He added that one property was separated out on the bottom because the property owner is not yet aware of the tree that has fallen on their property and they have until August 4th to reply and take action to abate the property.

Director Winn made a motion to approve Resolution 2017-24 confirming the report of the Fire Marshal related to cost of weed abatement and imposing such costs upon properties upon which abatement has occurred, seconded by Director Giraudo, and unanimously carried. (Roll call: Ayes: 5; Noes: 0)

B. Review and approve request to temporarily increase the approved positions listing by two (2) Firefighter/Paramedic positions – Chief Roberts stated that Staff is recommending a temporary increase in the approved positions listing allowing the Department to fill overtime created by strike teams, vacations, and long-term leaves until, through attrition, the number drops back down to the current approved number. He stated that the impact would likely be cost neutral and this would allow Staff to run one academy for five people rather than two separate academies.

Director Winn made a motion to approve request to temporarily increase the

El Dorado Hills County Water District Board of Directors Meeting July 20, 2017 Page 4

approved positions listing by two (2) Firefighter/Paramedic positions, seconded by Director Giraudo, and unanimously carried.

C. Review and approve Resolution 2017-25 in appreciation to Retired Captain/Paramedic Chris Storz

Director Durante made a motion to approve Resolution 2017-25 in appreciation to Retired Captain/Paramedic Chris Storz, seconded by Director Winn, and unanimously carried. (Roll call: Ayes: 5; Noes: 0)

D. Review and approve surplus vehicle; 8546 – Chief Roberts stated that 8546 is beyond the useful life and Staff would like to offer the vehicle to surrounding agencies for minimal cost.

Director Durante made a motion to approve surplus vehicle; 8546, seconded by Director Winn, and unanimously carried.

E. Review and approve purchase of command vehicle – Chief Roberts stated that Staff recommends purchase of a command vehicle as budgeted.

Director Winn made a motion to approve purchase of command vehicle, seconded by Director Durante, and unanimously carried.

The Board directed Staff to work with Counsel Cook to post a RFP for the sale of the unused property.

XI. OLD BUSINESS – None

The Board adjourned to discuss Closed Session Item VI-A at 7:24 p.m.

The meeting reconvened at 7:38 p.m. The Board took no action during closed session.

XII. ORAL COMMUNICATIONS

- **A. Directors** None
- **B.** Staff Chief Keating stated that a new crew replaced the strike team and it appears to be an active fire season.
- **C. Schedule upcoming committee meetings** The Board scheduled an Admin Committee meeting the week of August 1-3.

El Dorado Hills County Water District Board of Directors Meeting July 20, 2017 Page 5

XIII. ADJOURNMENT

Director Durante made a motion to adjourn the meeting, seconded by Director Hus, and unanimously carried.

The meeting adjourned at 7:48 p.m.

	Jessica Braddock, Board Secretary
m Hartley, President

Subject: Station 84 new roof

Dear Mr. Hartley,

The El Dorado County Building Permit office provided me with a list of recent roofs completed by Mountain Roofing Systems. I see that they replaced the roof on Station 84. They replaced a metal roof on my family's property and I have been spent years trying to get them to make the job right. Recently a CSLB investigator visited and noted 7 items in their work which do not conform to trade standards.

Most of these items are unique to the house the particular roof was put on, but some I suspect are present in much of the work performed by Mountain Roofing Systems. One example is the fact that they used an underlayment which is not approved for use under metal roofs, and (according to the manufacturer) will deteriorate under the heat of a metal roof. This can, among other things, eventually lead to roof leakage. The CLSB investigator has recommended that in order to fix this the entire roof be removed and replaced.

Additionally in my case, the ridge cap appears to not be installed properly, which may (and does appear to) lead to leaking in extreme conditions.

I was curious if you have experienced any issues with the new roof on station 84, and I wanted to recommend that you look into the materials used in your installation and ensure that the manufacturers specifications regarding materials and proper installation were adhered too in order to ensure the long-term durability of your roof. Additionally, I am now educated in some of the roofing requirements and if you need some assistance investigating (for example, whether or not the correct underlayment is applied) I would be happy to help you.

I have attached the report from the CSLB, if you wish to see more details.

Best Regards, Vincent R. Sherman PhD, Materials Science and Engineering University of California, San Diego (530) 308-3842 vsherman@ucsd.edu 9821 Business Park Drive, Sacramento, CA 95827 Mailing Address: P.O. RE: NA 2016-12438

As a party to the complaint referenced above, the Contractors State License Board is providing you copies of the following documents:

- 1. Items of Complaint and Findings by Expert
- 2. Photo Identification of Complaint Item

Please feel free to contact me at (916)

if you have questions.

Sincerely,

Bria Enforcement Representative Sacramento North Investigations Unit

- 1. Item of complaint: Snow bars not installed correctly per manufacturer's specs.
- 2. My observations: Photo 1a shows the missing dormer and the water test hose snaking up the roof. To the left of the missing dormer are two remaining snow bars. Photo 1b is a close-up of the snowbars. The upper one has seriously twisted over as a result of a snow/ice load. Whether it was a static dead load of ice and snow or a dynamic load (ice and snow sliding down the slick metal roof and impacting the snow retention device) I cannot say. I was furnished with documentation that shows the product used was SnoBar Metal Roof Wind Guard System. The installation instructions state "If additional rows of SNOBAR System are needed on the roof areas (based on the Design Considerations) make sure to layout and space of the additional rows equally up to the roof slope. See figure 2". This method was not employed by the roofer. The "Design Considerations" cited above further state "in instances where there is an overhang it is imperative to make sure that the overhang can hold the accumulated loading, otherwise, the first row of SNOBAR should occur at the bearing wall". Furthermore, para 2 goes on to say "It is not recommended the SNOBAR system be used in isolated areas such as doorways, vents and partial roof areas. PLEASE CALL FOR SPECIAL DESIGN CONSIDERATIONS IN THESE AREAS". The invoice for the order of the SNOBAR system by the contractor for the Sherman job, 18Jun16, has a bloc the contractor signed that declined the engineering that the SNOBAR company would provide. I was shown photos of the failed dormer lying in the snow and there were SNOBARS attached to the new metal roofing on the dormer. Photo 5f shows the condition of the dormer as the roofing contractor would have seen it at time of bid. There are no snow retention devices on the dormer. Additionally, it is tenuously supported by a cantilevered beam on beam system which was toe-nailed into the top face of the roofing 2x membrane. This also would have been visible as the dormer was open ended and not enclosed. I use the word 'tenuously' because that method of support would not be approved in any plans or inspections today or in the past. That whole system relies on a few nails between projecting beams and the roof decking and whatever nailing was used between the viewable plates the dormer rafters rested on. To assume that because this dormer hadn't yet fallen that any new roofing system and snow retention system would not cause it to fail would be short-sighted. The code has continually evolved for snow loaded roofs in the Sierras as long existing roofing systems collapse under unusual snow loads. The changes in the code cover size of rafters, decking, beam sizing, water

barriers, connectors. etc. METAL ROOFS ARE NOTORIOUS AND DEPENDABLE FOR SHEDDING LARGE QUANTITIES OF SNOW AND ICE ALL AT ONCE. Any roofer should know this It is not unusual for a re-roof to generate a building department requirement to have the whole roof engineered and checked. This is steep pitched roof designed to shed snow easily but is complicated by the non-existence of roof insulation. There is no attic space. The wood planking seen in photo 5a is the same planking seen in photo 6b. There was no insulation in the roof prior to re-roof and at least the re-roof provided some new insulation, though far short of the R-38-45 required in new construction. So the other condition that presented itself to the contractor at bid time was an uninsulated or potentially under insulated roof system with a cathedral ceiling where hot air rises and can cause ice damming anywhere on the slope of the roof, not just starting at the eave.

(In	dicate your response to 3 and 4, listed below, by marking	ig the approp	priate box:)		
3.	Complaint item conforms to plans and specifications:	N/A	Yes	No_	_x
4.	Complaint item meets accepted trade standards:		Yes	No_	x

- 5. Industry standard is: Comply with manufacturer's specs and recommendations.
- 6. Cause of defect: There are a number of factors that probably contributed to failure. The contractor failed to observe the precariousness of the dormer construction, failed to have an engineer check its integrity, failed to heed the recommendations of the SNOBAR manufacturer with regards to three points: 1. Don't load an overhang by installing our product without consulting us. 2. Consider distributing the static load by spacing SNOBARS spaced up the roof 3. Use our engineering/design services for unusual roof areas. The contractor failed to take into account the tendency of a metal roof to shed its load all at once under warming conditions, be those conditions from outside or from within the house via heating.

(Identify how the work of the complaint item fails to meet any industry standard(s) described above, or is otherwise deficient. Reference to any of the various building codes must be clearly specified.)

- 7. Method of correction: See complaint 6.
- 8. Cost to correct (this item only): See complaint 6

1. Item of complaint: Owens Corning underlayment installed not appropriate for ASC specifications.

My observations: The Mountain Roofing Systems contract states in line #3 that the underlayment will be a high temperature underlayment. The patch of underlayment showing in photo 2 is a granulated barrier which appears to be Owens Corning Weatherlock G Granulated Ice and water Barrier. In the installation sheet for this product the following restriction is found: "Precautions 1. WeatherLock products should be installed by a professional roofing contractor. WeatherLock underlayment is designed to be covered by asphalt shingles, wood shakes or quarry slate roof assemblies. Protection from sunlight is required to assure its long-term performance". Metal roofing is significantly omitted. The product OwensCorning recommends for metal roofing is WeatherLock Specialty Tile and Metal Waterproof Barrier. It is specifically made for the high temperatures that will be encountered with metal roofing. I called their customer service and they stated this is the barrier recommended for metal and that other barriers will deteriorate under these ranges of temperature. I could not ascertain the degree of deterioration of the OC Granulated barrier, if any, from the small pieces poking out from underneath the metal roofing adjacent to the old dormer's location. But I was able to remove a sample for later identification. Whether potential unobservable deterioration contributed to the roof leaks addressed in complaint 5 I cannot say. But barrier degradation due to heat is not an overnight event but rather a longer term process. OC recommends that this and any barrier go over a vented roof, which this roof is not. That specification is a recognition that a vented roof is cooler and will contribute/extend to the life of a barrier. (Indicate your response to 3 and 4, listed below, by marking the appropriate box:)

2.	Complaint item conforms to plans and specifications:	N/A	Yes	No_	X
3.	Complaint item meets accepted trade standards:		Yes	No_	_x

- 4. Industry standard is: Provide what is in the contract. Follow manufacturer's specifications.
- 5. Cause of defect: Contractor failed to use the type barrier specified in the contract, (a barrier compatible with a metal roof....my words).
 (Identify how the work of the complaint item fails to meet any industry standard(s) described above, or is otherwise deficient. Reference to any of the various building codes must be clearly specified.)
- 6. Method of correction: See complaint 6
- 7. Cost to correct (this item only): See complaint 6

- 1. Item of complaint: End of roof panels do not have required screws.
- 2. My observations: Photos 1b, 3 & 4d show no screws along the bottom edge of the roof panels. The ASC installation guide for Skyline 16" roofing panels, Page 10, point 8 under Procedures for panels less than 40 ft, requires a line of screws along the bottom of edge of the roofing pans as further shown in figure #5 of the same page. Also I could not detect the use of ½" butyl tape under pan edge when viewing the roof as seen in photo 3. This is required in the installation manual under Eave and Vented eave Flashings, diagram on page 16.

(Indicate your response to 3 and 4, listed below, by marking the appropriate box:)

3.	Complaint item conforms to plans and specifications:	N/A	Yes	No _	_x
4.	Complaint item meets accepted trade standards:		Yes	No _	_x

- 5. Industry standard is: Follow manufacturer's specs.
- 6. Cause of defect: Contractor failed to install screws and butyl tape at end of panels at eave as required in the installation manual.
 (Identify how the work of the complaint item fails to meet any industry standard(s) described above, or is otherwise deficient. Reference to any of the various building codes must be clearly specified.)
- 7. Method of correction: See complaint 6
- 8. Cost to correct (this item only): See complaint 6

- 1. Item of complaint: Paint on ice and snow splitters has peeled.
- My observations: Photos 4a-d show splitters whose finished has nearly disappeared. Also paint on the vent boots has crumbled. These boots are some form of rubber and highly susceptible to UV degradation, a serious issue at higher elevations.

(Indicate your response to 3 and 4, listed below, by marking the appropriate box:)

3. Complaint item conforms to plans and specifications: N/A _____ Yes ____ No __x __

4. Complaint item meets accepted trade standards: Yes _____ No __x ___

- 5. Industry standard is: If non-manufacturer flashings (splitters in this case) are used it is general practice to paint them to match the roof. The paint used must be of a type that is made to attach to metal and withstand high temperatures. Although not required by code as far as I can determine, it is also good practice to coat rubber boots against UV degradation. It is also the reason behind the code requirement to paint all protruding ABS vent pipes.
- 6. Cause of defect: Contractor failed to apply the correct paint to splitters.

 (Identify how the work of the complaint item fails to meet any industry standard(s) described above, or is otherwise deficient. Reference to any of the various building codes must be clearly specified.)
- Method of correction: Scrape off remaining paint and repaint splitters and boots with paint made for metal coating.
- 8. Cost to correct (this item only): \$280

- 1. Item of complaint: Roof leaks per hose test.
- 2. My observations: The roof leaked at the peak where the test hose was placed as seen in photo 5e. Photo 5a shows the water streaks on the underside of the interior roof decking. The leak test only caused leaking when water was applied to the ridge. Photos 5b-d show ridge cap flashing attachment on the roof as well as chimney cricket. I could not see any upturned edge of the roofing pan top edge as required in installation manual, Hip and Ridge Flashing. This would be a less desirable alternate to using ASC's polyethylene closure set and caulking, which I was not able to observe (if it exists I wouldn't be able to see it without ridge cap removal). The contractor ordered and uses a venting ridge cap for a roof that has no venting membrane. Wind driven rain can easily be blown up under any ridge cap regardless of pitch. Also one would expect the water resistant barrier to wrap over the ridge and lap over the WRB of the roof that lies directly under the roofing. Obviously this ridge wrap was non-existent or somehow compromised. The dilemma a roofer faces on an old structure is that in placing water and ice shield on the roof decking there is then a vapor proof system that causes moisture from sources within the house to condense on the underside of the barrier and drip back into the roof decking and house. This is why it is so essential to have a ventilated cavity from eave to ridge and a porous polyethylene sandwich between roof pans and ridge cap that can vent air but stop wind driven rain. It is not necessarily wind-driven rain that can penetrate the ridge flashing. In cathedral ceilinged roofs that have no or marginal insulation, ice damming can occur anywhere along the roof pan. And highest melting/freezing activity occurs at the point of greatest interior heat accumulation, which in the case of a cathedral ceiling, would be at the peak.

(Indicate your response to 3 and 4, listed below, by marking the appropriate box:)				
3.	Complaint item conforms to plans and specifications:	N/A	Yes	No _x
4.	Complaint item meets accepted trade standards:		Yes	Nox_

- Industry standard is: Ridge gets wrapped with WRB. Follow manufacturer's specifications for installation and waterproofing measures.
- 6. Cause of defect: <u>Unsure.</u>
 (Identify how the work of the complaint item fails to meet any industry standard(s) described above, or is otherwise deficient. Reference to any of the various building codes must be clearly specified.)

- 7. Method of correction: See complaint 6
- 8. Cost to correct (this item only): See complaint 6

- 1. Item of complaint: Detached dormer is not replaced.
- 2. My observations: Photo 6 and 1a show the dormer is gone. I would not frame the new dormer in the same manner as the original. If it projects as far from the eave as the original it needs additional support provided by either angled 4x4 braces back to the siding or 4x4 posts to ground. As I have stated in complaint 1, this dormer's failure likely would have been preventable had the contractor not loaded it with snow retaining SNOBARs, had taken advantage of the SNOBAR engineering option, and had recognized the danger that a new metal roof might impose on the dormer by dynamic loading (melting slabs of ice and snow sliding off the roof). Had SNOBARS been used above the dormer in a manner recommended by SNOBAR literature this would have also prevented large sliding masses of snow and ice. I believe the contractor thought that the steep pitch alone would take care of ridge sealing as well as snow buildup, but just the opposite happened. And any cursory examination of the original dormer would have alerted most contractors to the probable precarious attachment and support that did exist with the original dormer.

(Indicate your response to 3 and 4, listed below, by marking the appropriate box:)

3.	Complaint item conforms to plans and specifications:	N/A	Yes	S No _x_	
4.	Complaint item meets accepted trade standards:	1	Yes	No _	_x
5.	Industry standard is: Replaced what is damaged by cor	astruction activi	ties. Follow	manufac	turers'

No x

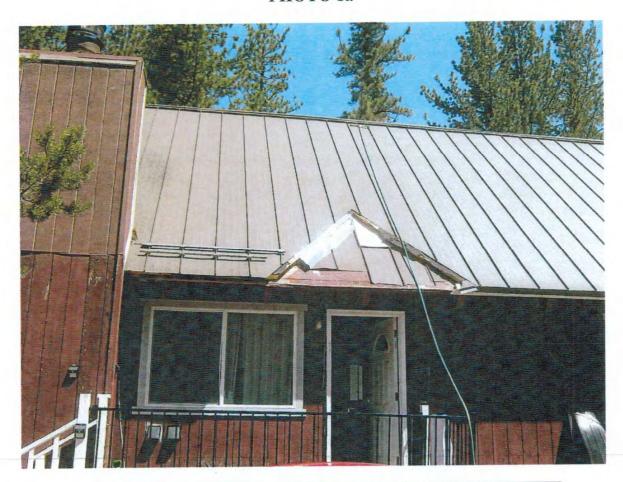

- specifications.
- 6. Cause of defect: Contractor failed to replace dormer. (Identify how the work of the complaint item fails to meet any industry standard(s) described above, or is otherwise deficient. Reference to any of the various building codes must be clearly specified.)
- 7. Method of correction: I think the entire roof needs to be disassembled and re-attached. This is because the wrong WRB was used and the owner now has no warranty for leakage. Furthermore, the ridge cap flashing is done incorrectly because it leaks and because I cannot observe the upturned edge required in lieu of the use of a polyethylene gasket and caulking required by the roof manufacturer. Also screws will need to be attached to pan bottoms along the eaves along with 1/2" wide butyl tape . The SNOBARS should not be attached to the dormer but there should be three sets of SNOBARS above the dormer, as further determined by SNOBAR engineering. I am assuming that with careful removal all of the existing roofing metal can be re-used, with the possible exception of the bent pan/s

- to the left of the dormer location. The dormer would need to be framed differently for sufficient support and I think that extra cost would have been borne by the owner had the problem been identified at the time of bid. So would the cost of additional SNOBARS.
- Cost to correct (this item only): Original contract minus reusable roofing and SIP panels, screws and the labor to install those panel......added to which is the additional labor to tear off: Total\$9281

1.	Item of complaint: Deck and railing damage from dormer is not rep	aired.	
2.	My observations: Photos 7a, b show the original railing system still	ascending the s	steps but the
	damaged railing has temporarily been replaced with a metal railing.		
(In	dicate your response to 3 and 4, listed below, by marking the approp	riate box:)	
3.	Complaint item conforms to plans and specifications: N/Ax_	Yes	No
4.	Complaint item meets accepted trade standards:	Yes	Nox
5.	Industry standard is: Repair owner's property damaged by construc	tion activity or	subsequent product
	failure.		
6.	dormer.		
	(Identify how the work of the complaint item fails to meet any industries or is otherwise deficient. Reference to any of the various building of	try standard(s) codes must be c	described above, learly specified.)
7.	Method of correction: Replace metal railing with redwood/cedar/P	Γ wood system	similar to stairs.
	Prime and paint.		

8. Cost to correct (this item only): \$460

PHOTO 1a

Date Photograph Taken:	13July17

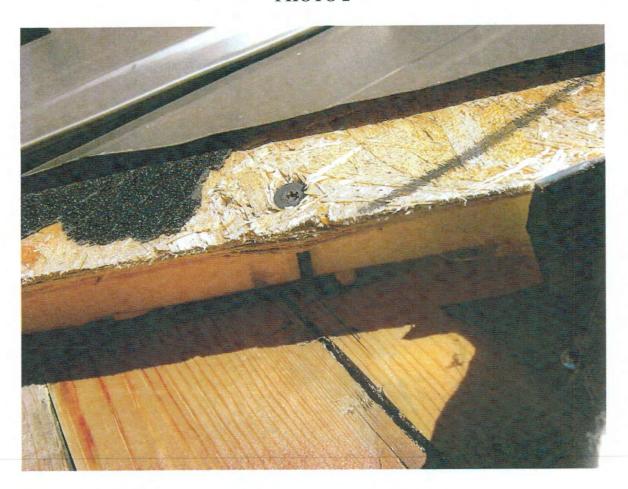

Description: . View of missing dormer. Two remaining Sno-Bars to left of dormer still attached to roof.. Hose on roof attached to a sprinkler that demonstrated leakage at the ridge which could be viewed from the inside roof underside in short time.

PHOTO 1b

Date Photograph Taken:	13July17

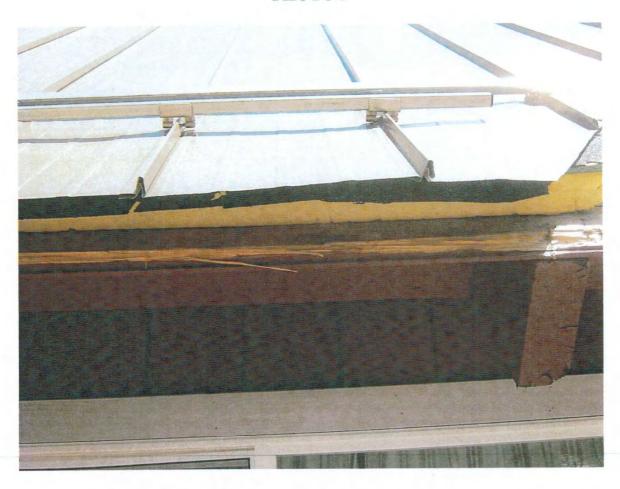

PHOTO 2

Date Photograph Taken:	13July17	

Description: . View of the exposed roof deck where dormer existed. New insulated panel is attached with required screws (large black screw) and Owens Corning Weatherlock Granulated Ice and Water Barrier has been used as an underlayment. It is the black patch lying between the metal roof and the insulated panel.

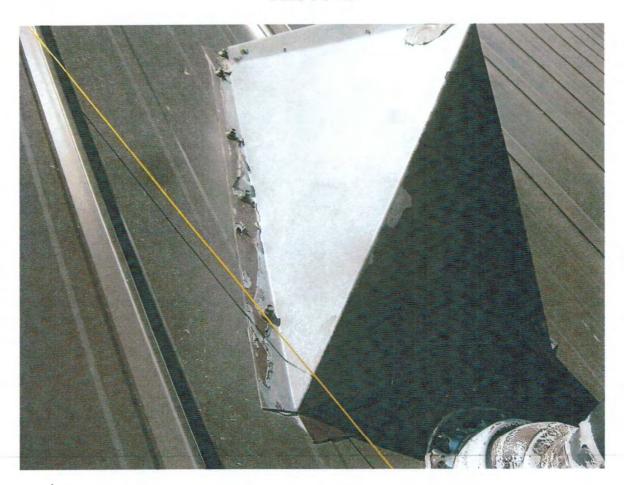

PHOTO 3

Date Photograph Taken:	13July17	

Description: . View at eave to left of missing dormer. The two pans have been slightly bent by the dormer failure. There are no screws attached to the pans at their bottom, a condition found along the entire perimeter.

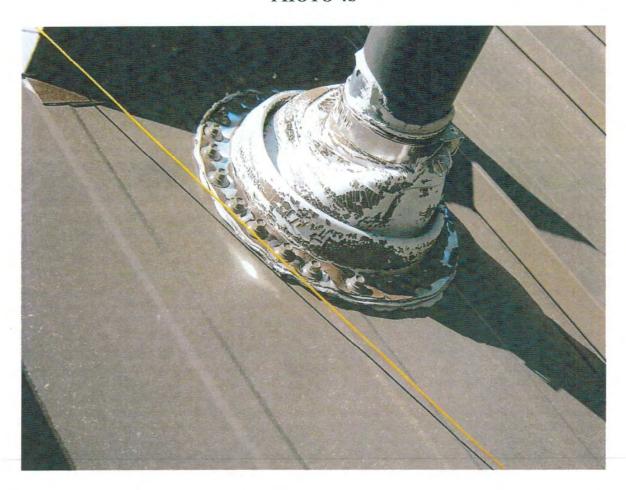

PHOTO 4a

Date Photograph Taken:	13July17	

Description: . A snow "splitter" was finished with some sort of color matching paint by the contractor that has completely deteriorated.

PHOTO 4b

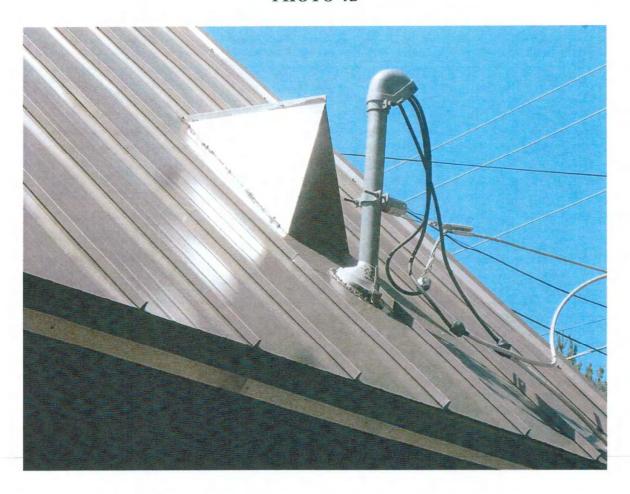

Date Photograph Taken:	13July17	
Description: .	Paint on new boot has completely failed	

PHOTO 4c
